

NEW: Box Target

The Box Target consists of a target box fitted with a sensor array that guarantees exceptional accuracy for small arms. The electronic is sealed in an aluminum case making it suitable for both indoor and outdoor use.

Application:

Besides a fix installed device it is now possible to use the Box Target as a mobile solution or mounted on a mover. Additionally, it can be installed on a rotary module to create more demanding scenarios with friend / foe situations. This can be especially challenging for sniper training.

The New Box Target can also be manufactured in larger dimensions onto which a movie or a picture can be projected so that it can be used as a live fire shooting cinema.
