Control unit with printer

Target picture band for hunting

Technical Specifications

Caliber:	Up to 9.65mm / 0.38"
Hit Detection:	Electronic
Measuring Accuracy:	≤ 5mm
Automatic Target Changer:	Target picture band with 5 different target pictures
Power:	Mains 230VAC 50Hz or 115VAC 60Hz
Dimensions:	Butt terminus 1400 x 325 x 1728 mm Control unit 270 x 430 x 470 mm
Weight:	Butt terminus 155kg / 342lb Control unit 12kg / 26lb

Description

The TG 6051 KJ is the most modern 100/150 m Electronic Hit Scoring System for hunting. The integrated automatic target changer makes the system versatile and very easy and safe to use. The shooter sees the target picture with the hit position in graphic form on the monitor (3 zoom levels) and on the printout. The target picture automatically changes according to the selected program. Most of the hunting programs are available. The system is used for combined hunting training and competition shooting.

Features

- Maximum operation security due to the most modern electronics
- Simple handling
- Most of the hunting programs
- Graphic presentation of the hit position
- 3 zoom levels
- x/y coordinates and radius on monitor and printout
- Integrated automatic target changer
- Silent result printout (also graphically)
- Plug-in module technique
- Simple installation
- Almost maintenance free
- Minimum wear
- Program Editor

Components

- Control unit complete with microprocessor, thermo-printer and shooter's monitor
- Butt terminus with target and target changer electronics in shot protected housing with splinter protection
- Data cables
- Power supply
- Barcode scanner to read-in shooting programs

Graphic result printout

Related Equipment

- PC for result printout and rank list
- Large screen and/or additional monitors
- LCD Monitor, Matrix Printer
- Remote Control
