Analysis of shooters movement during aiming

Technical Specifications

Shooting Distance:	3 - 50m
Temperature Range:	0°C to +50°C
Power:	Standard 9V Battery
Weapon Clamps:	12 - 45mm barrel
Optical Unit Weight:	96 g

Description

The optical sporting training system is compact and portable making it ideal for home use. Training at home reduces costs and increases concentration – a double benefit. Furthermore, as it can be set-up in almost any location it can be taken to competitions for sighting practice between events. The ST 2000 is simply the best sport shooting trainer ever made!
